GENIE MINI

Motion Control in your pocket! The Genie mini is an extremely easy-to-use device to create smooth panning motion time-lapse or real-time video. Wirelessly connect to the Genie Mini using the Syrp Genie App for quick setup and smartphone control.

The Genie Mini is compatible with almost all DSLRs and Mirror-less cameras as well as GoPros and Smartphones. The Genie Mini also plays nicely with the Genie, the products can be synced to create professional 2-Axis motion control.

PORTABLE

The Genie Mini packs a lot of punch and is designed to be extremely portable, easily slotting into the smallest of carry bags or even straight in your pocket.

TIME-LAPSE

Simply attach the Genie Mini to a tripod and shoot smooth panning time-lapse moves using the Syrp Genie App.

REAL-TIME VIDEO

In video mode the Genie Mini moves at a perfectly smooth continuous speed for accurate panning moves.

SIMPLE

The Genie Mini is designed to be incredibly simple and is beginner time-lapse friendly. The Syrp App is equip with factory pre-sets so you can start shooting straight out of the box with no technical expertise required. Just connect and shoot!

COMPATIBLE

The Genie Mini is compatible with a huge range of cameras and works with your smartphone, GoPro, mirror-less camera or DSLR.

2-AXIS ADD-ON

The Genie Mini is designed to play nicely with the Genie. Shoot next level 2-axis time-lapse or motion control video and add production value to your films by syncing the two together.
*Note the Sync cable for connecting Genie + Genie mini sold separately and can be found in the accessories section.

EASE IN / EASE OUT

The ease in, ease out feature allows you to ramp your movement at the beginning and end of your time-lapse or video move. Once set, the movement will slowly rise up to your desired speed at the start of your shot and gradually dampen down at the end before coming to a complete stop.

HDR

The Genie mini enables beautiful HDR time-lapse, giving your footage a stand-out effect by allowing for greater dynamic range in your final video.
